

Fire Innovations™ NFPA Certified Escape & Ladder Belts

Inventive Technology for Fire & Rescue Service

Cheyenne Escape & Ladder Belt™ (1101-0001)

Overview

The Cheyenne is our most versatile belt due to its double layer construction and custom fit for the individual. The Cheyenne is to be worn over the turnout coat, and can be finely adjusted for comfort and fit. The Cheyenne's ambidextrous design incorporates gear loops on both sides and a fixed NFPA D-Ring (attachment point). The gear loops allow accessories to be attached, such as axe loops and scabbards. Some of the Cheyenne's available options include a second sliding NFPA D-Ring and a rearward NFPA positioning point/tag ring. The Cheyenne is ready to accept a variety of non pre-rigged or pre-rigged bailout systems. Our patented Multi-Use Strap™ is also available as an option to add NFPA Ladder Belt certification, along with numerous other RIT/RIC procedures.

Key Features

- Custom Sized to firefighter
- Assigned to an individual
- Versatile and Easy to don
- Forward pull fine adjustment
- Right or left handed use
- Double layered Kevlar construction
- Parachute rated buckles
- Modular design
- NFPA Ladder Strap ready

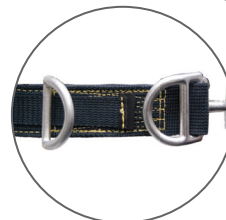

Cheyenne Series Escape & Ladder Belts are certified as compliant with NFPA 1983 - 2012 Edition FR Option

Cheyenne Escape Belt shown here with optional Positioning/Tag Ring

The Cheyenne utilizes a simple pull forward fine adjustment system.

An floating NFPA attachment point is available as an option at the time of purchase.

The Cheyenne belt can be installed with an optional NFPA positioning point.

Comanche Escape & Ladder Belt™ (1101-0005)

Overview

The Comanche provides departments with the ability to assign and reassign a single belt to any firefighter. The firefighter can then adjust the belt to his or her preference. The Comanche can be worn over the turnout coat or pants. The gross adjustment in the rear sizes the belt to the individual, while the adjustment in the front provides an exact fit. The Comanche's ambidextrous design incorporates gear loops on both sides and a fixed NFPA D-Ring (attachment point). The gear loops allow belt accessories to be attached. Some of the Comanche's available options include a second sliding NFPA D-Ring. The Comanche is ready to accept a variety of non pre-rigged or pre-rigged bailout systems.

Our patented Multi-Use Strap™ is also available as an option to add NFPA Ladder Belt certification, along with numerous other RIT/RIC procedures.

Key Features

- One size fits all
- Assigned to an individual
- Forward pull fine adjustment
- Right or left handed use
- All kevlar material construction
- Parachute rated buckles
- Modular design
- NFPA Ladder Strap ready

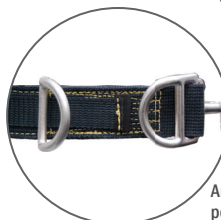

Comanche Series Escape & Ladder Belts are certified as compliant with NFPA 1983 - 2012 Edition FR Option

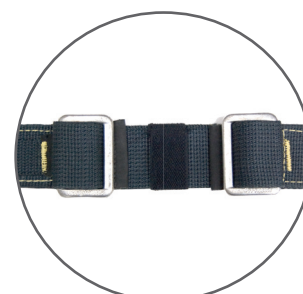

Comanche Escape Belt shown here with the optional floating NFPA Attachment point

The Comanche utilizes a simple pull forward fine adjustment system.

An floating NFPA attachment point is available as an option at the time of purchase.

Two (2) rear adjusting buckles allow for quick gross adjustment to firefighter waist size.

Mohawk Escape & Ladder Belt™ (1101-0004)

Mohawk Series Escape & Ladder Belts are certified as compliant with NFPA 1983 - 2012 Edition FR Option

Overview

Our latest belt, the Mohawk, is designed for a department that wants a single belt solution for all their firefighters. The Mohawk is truly a one-size-fits-all belt. The Mohawk allows for a rapid adjustment to any firefighter and is commonly placed on an apparatus. The Mohawk's ambidextrous design incorporates gear loops on both sides and a fixed NFPA D-Ring (attachment point). The gear loops allow accessories to be attached, such as axe loops and scabbards. The Mohawk is ready to accept a variety of non pre-rigged or pre-rigged bailout systems. Our patented Multi-Use Strap™ is also available as an option to add NFPA Ladder Belt certification, along with numerous other RIT/RIC procedures.

Key Features

- One size fits all design
- Assigned to Position/Seat
- Fast on-the-fly adjustments
- Modular and customizable
- Right or left hand use
- Parachute rated buckles
- All kevlar material construction
- Modular design
- NFPA Ladder Strap ready

The Mohawk utilizes a simple pull forward fine adjustment system

The rear adjustment strap allows for rapid on-the-fly adjustment to the firefighter waist size.

Spokane Escape & Ladder Belt™ (1101-0007)

Spokane Series Escape & Ladder Belts are certified as compliant with NFPA 1983 - 2012 Edition FR Option

Overview

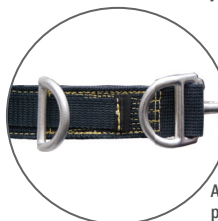

The Spokane is intended to be assigned to individuals within the department. The design of the Spokane offers minimal interference from accessories and is to be worn on the turnout pants. The Spokane's double layer construction offers durability and can include a rearward NFPA positioning point (tag ring). Spokane comes standard with one fixed and one floating NFPA D-Ring (attachment/positioning point). The Spokane's ambidextrous design allows a variety of non pre-rigged or pre-rigged bailout systems to be worn on either side. Our patented Multi-Use Strap™ is also available as an option to add NFPA Ladder Belt certification, along with numerous RIT/RIC procedures.

Key Features

- Custom sized to firefighter
- Assigned to an individual
- Worn on turnout pants
- Two NFPA attachment points
