- Ambidextrous design (Left or right handed)
- Rapid size adjustment
- Easy pull forward final adjustment
- UL rated buckles

\*requires optional ladder strap Item:1101-0090

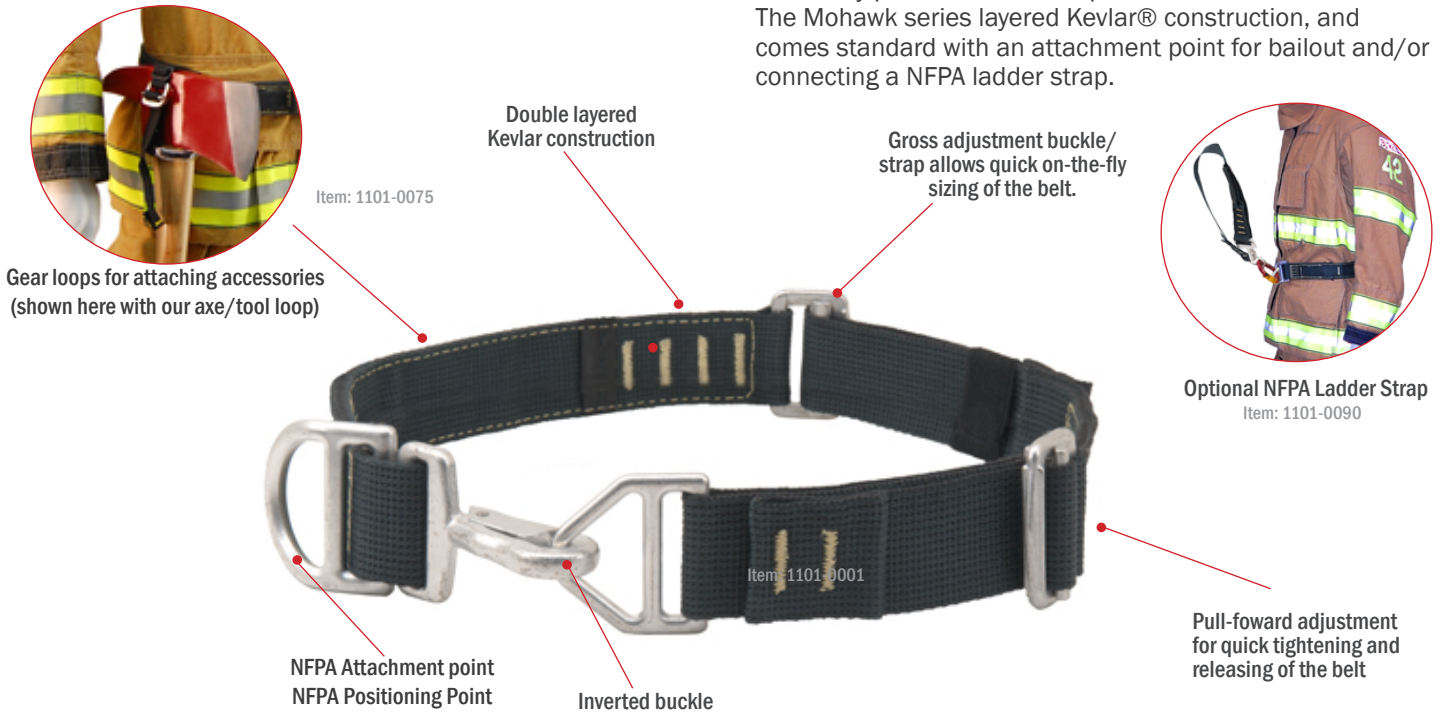

## PRODUCT OVERVIEW

The Mohawk Belt is an escape belt, certified by UL to NFPA 1983, incorporated in the 2022 Edition of NFPA 2500, and the optional flame resistance requirements of NFPA 1983. It is easy to use and makes an outstanding multi-function firefighter escape and ladder belt.

The accessory Kevlar gear loops are located on both sides, and aid the modular design of this belt. They add to its great versatility by allowing incorporation of various upgrades and accessories.

A patented Multi-Use Strap can be added, and functions as a NFPA ladder strap, a one leg harness, and various RIT and victim carries/drag. This strap can be neatly stowed inside an accessory pouch or a turnout pocket.

The Mohawk series layered Kevlar® construction, and comes standard with an attachment point for bailout and/or connecting a NFPA ladder strap.
